

# Safeguarding Your Data

## We're enhancing your account security with **Multi-Factor Authentication (MFA)**

Safeguarding your online identity and sensitive information is more critical than ever. That's why we're introducing MFA to bolster the security of your Xemplo account. MFA adds an extra layer of security by requiring you to provide your password and a verification code when logging into Xemplo.

By using MFA, even if someone manages to obtain your password, they won't be able to access your Xemplo account without the verification code sent to your device or email. This dramatically reduces the risk of unauthorised access to your data and information.

You can choose to have your verification code sent to you via an authenticator app (like Microsoft Authenticator(tm), as an SMS to your phone, or via email.

Verify your mobile number

We've sent a code to +614\*\*\*\*\*156.

Didn't receive it? [Resend](#)

Enter the 6 digit verification code

Verify mobile number

Google Authenticator
